FUEL STABILIZER

Lucas Oil Fuel Stabilizer keeps fuel fresh for quick and easy starts after storage. Lucas Oil Fuel Stabilizer is formulated with powerful antioxidants and dispersants to prevent fuel degradation that causes gum and varnish deposits in fuel injectors, carburetors, or throughout the fuel system. Lucas Oil Fuel Stabilizer contains corrosion inhibitors and lubricants to keep all engines running in top conditions, whether they've been run daily, or stored for the season. One treatment eliminates the need to drain fuel from seasonal equipment on any two or four-cycle engine. Lucas Oil fuel Stabilizer is suitable in all gasolines including ethanol blends up to E-85 and in all two and four-stroke engines. Our product is alcohol free and is perfect for small and large engines from lawn equipment and generators to collector cars, motorcycles, or RVs.

Lucas Oil recommends one (1) fluid ounce treats 2.5 gallons of gasoline. One 16oz bottle treats up to 40 gallons of fuel.
