HIGH PERFORMANCE MOTORCYCLE OILS

Lucas Oil High Performance Motorcycle Oils are specially formulated for enhanced engine cleanliness and oil life. Our unique detergent additive system resists sludge and varnish formation, while combating combustion chamber and piston deposits to prolong engine life.

Lucas Oil High Performance Motorcycle Oils are polymer modified to provide ultra-low friction to reduce engine temperatures and maintain oil pressure for increased performance and quiet operation, and our shear resistant formulation will maintain film thickness, mile-after-mile. These premium motorcycle oils provide outstanding wear protection for your bike's engine and help maintain and improve fuel economy and oil drain interval.

Lucas Oil High Performance Motorcycle Oils meet or exceed the API SN performance specification, as well as most motorcycle industry and OEM specifications (such as JASO MA/MA-2) in each viscosity grade.

PART NUMBER AND SIZE:

SAE 10W-40 - 20767 (1 Quart)
SAE 20W-50 - 20700 (1 Quart),18032 (6 Gallon BIB)

FEATURES AND BENEFITS:

- Specialty formulation for enhanced engine cleanliness.
- Extreme wear protection for vital engine and transmission components.
- Resists oxidation and formation of sludge and varnish.
- Shear-stable polymers for high temperature film thickness and long oil life.

SPECIFICATIONS, APPROVALS AND RECOMMENDATIONS:

Meets / Exceeds:

API SN, SM, SL, SJ • JASO MA/MA-2

MAIN APPLICATIONS:

Outstanding performance in ALL air-cooled and water-cooled 4-stroke motorcycle engines or other small engines.

TYPICAL PHYSICAL CHARACTERISTICS:

PROPERTIES	ASTM	10W-40	20W-50
API Gravity	D4052	31.35	29.78
Specific Gravity @ 60˚F	D4052	0.8685	0.8783
Density @ 60˚F, Lbs/US Gal	D4052	7.110	7.315
Viscosity @ 40˚C cSt	D445	89.5	137
Viscosity @ 100˚C cSt	D445	14.52	18.85
Viscosity Index	D2270	169.2	140.4
Color		Amber	Amber
Flash Point, COC ˚F	D92	400	405

These characteristics are typical of current production. However, slight variations in these characteristics may
